VISION

Vision : To participate in sustainable socio-economic development of our beloved country and contribute to save energy, which is the great desire of the government of people's republic of Bangladesh.

Mission : To play a vital role in the energy saving sector of our country by producing environment friendly electric products and create employment opportunity to convert our human resources into strength.

PROMISES

Promises : Committed to customer's satisfaction through integrity, excellent operation systems, best quality products with continual product development and strong supply chain management system for our valued customer.

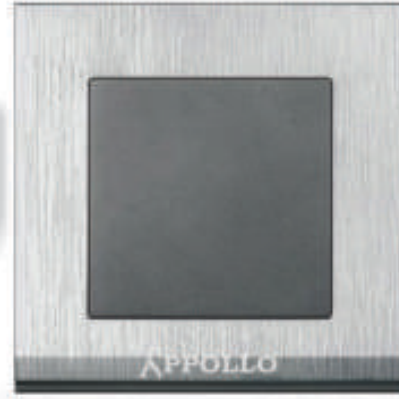

ABOUT US

APPOLLO Power Limited is a private limited company and started our journey with a single product name APPOLLO CABLES in 2006. Since then, the company has been looking forward to serve its valued customers with a variety of products and has been diversifying its product's range into a number of electric and electronic items. The company has been manufacturing Ceiling Fan, Cables, Bakelite products such as Switch Sockets Regulators etc. We have established a well fabricated factory at Matuail in the area of Dhaka City Corporation with world class machineries. The Company also involved in trading based business through importing Gang switch & Socket, Circuit Breaker, LED Light etc. The Expertise personnel set up and skilled man power are the main resources of the company as well as strong marketing set up all over the country. In the field of Electric & Electronics markets, we have already established our Brand image & good reputation through our best quality products and strong distribution channel. The company has already created job opportunity of about 1000 individual and always trying to contribute socio-economic development of our beloved country.
